

Initiative Zero

Step 1

The Company has to sign a document that certifies the enrollment in the Initiative Zero and that illustrates the terms and conditions of the Initiative itself.

The content of the document, provided by DPT, has to be copied on the Company's headed paper, stamped and signed by the CEO or by the person in charge of the Department. After this, the document needs to be sent to DPT via e-mail.

Step 2 a (optional)

If the out-of-maintenance permanent licenses, which are going to benefit from Initiative Zero's advantages, are currently still in use, DPT will provide 1-week licenses – in the requested version – to support the subsequent export operation and not to cause any interruption at work at the customer's Company.

Step 2 b

The Company has to export the old permanent licenses by sending the .tbu files - as proof of the export – to the Password Release Service (pwdrelease@think3.eu) and/or, in case of licenses on USB/Parallel dongles, by returning those devices to DPT, at the following address:

*DPT srl
Viale Angelo Masini, n. 12
c/o Regus - 40126 Bologna*

Instructions to export licenses

Launch ThinkDesign and select **Help → License Administrator**. Then apply the **Edit → Export Licenses** command.

Step 3

Once you send back the signed document and the .tbu files/dongles, DPT will provide you with the ASF (Annual Subscription Fee) licenses in the requested version. These licenses will be active until 31/05/2018; after this date, they will stop working unless you renew them.

At the end of the first free-of-charge year, the Company can decide whether and how many licenses to renew, of course always as ASF.

The renewal special conditions will be illustrated in the above-mentioned document. The price of each license corresponds to half of the ASF price established in DPT Price List.
